

## COMUNICATO STAMPA

### STANDARD & POOR'S CONFERMA IL RATING DI CATTOLICA DOPO L'ACQUISIZIONE DI FATA

Verona, 28 novembre 2013. Oggi Standard & Poor's ha confermato il rating di Cattolica a BBB dopo l'annuncio lo scorso 20 novembre dell'acquisizione di Fata Assicurazioni da parte del Gruppo. L'acquisizione avrà un impatto marginale sull'adeguatezza di capitale di Cattolica anche grazie all'emissione da parte della Compagnia di strumenti di debito in forma subordinata.

Secondo Standard & Poor's, l'acquisizione consolida la forte posizione competitiva del Gruppo, apportando circa 400 mn € di premi e un incremento di un punto percentuale della quota di mercato nel business danni. Standard & Poor's considera i rischi di integrazione limitati.

L'*outlook* permane "negativo" in base unicamente alla previsione dell'agenzia di rating circa i trend economici e finanziari del mercato italiano, incerti e potenzialmente sfavorevoli, e potrebbe essere rivisto a "stabile", in funzione di una revisione positiva dell'*outlook* dell'Italia da qui a due anni.

## Research Update:

# Societa Cattolica di Assicurazione 'BBB' Ratings Affirmed On Acquisition Of Fata Assicurazioni; Outlook Negative

## Overview

- On Nov. 20, 2013, Italy-based Societa Cattolica di Assicurazione (Cattolica) announced the acquisition of Fata Assicurazioni from Assicurazioni Generali SpA for €179 million.
- The acquisition is a good business and geographic fit, in our view, as it reinforces Cattolica's presence in motor insurance and in northern Italy.
- We expect the acquisition to have a slightly negative impact on Cattolica's capital adequacy, to be partially alleviated through an upcoming subordinated debt issue.
- We are consequently affirming our 'BBB' ratings on Cattolica.
- The negative outlook reflects that on Italy, as well as our views of the risks of further weakening of Cattolica's capital adequacy and risk position.

## Rating Action

On Nov. 28, 2013, Standard & Poor's Ratings Services affirmed its 'BBB' insurer financial strength and counterparty credit ratings on Italy-based composite insurer Societa Cattolica di Assicurazione (Cattolica). The outlook is negative.

At the same time, we assigned a 'BB+' issue rating to Cattolica's planned subordinated, unsecured debt issue.

## Rationale

The affirmation reflects our view that the announcement of the acquisition of Fata Assicurazioni from Assicurazioni Generali SpA for €179 million does not change our view of Cattolica's satisfactory business risk profile and lower adequate financial risk profile.

Cattolica's business risk profile remains satisfactory, in our view. The acquisition consolidates Cattolica's strong competitive position by adding about €400 million in gross premium written and about one point of market share in property and casualty insurance. Fata will strengthen Cattolica's motor insurance business, its specialty product line, and its market share in semiurban regions of northern Italy, where Cattolica mainly operates. We believe integration risks are limited and we expect Fata's operating

performance to be in line with that of Cattolica.

Cattolica's financial risk profile will remain in line with our current lower adequate assessment. The acquisition has a negative impact on Cattolica's capital adequacy, however, generating an expected €60 million in goodwill and increasing risk-based capital charges by an estimated 7%. Cattolica's announcement of an upcoming issue of €50 million-€100 million in subordinated debt will allow capital adequacy to remain within our lower adequate range. We do not consider Cattolica's and Fata's combined earnings generation capacity to be sufficient to restore capitalization to adequate levels over that time frame. Under our base-case scenario, we expect the group, including Fata, to report net income before minority shareholdings of between €80 million and €90 million in the next three years. We have also taken into account a dividend payout ratio of 60%.

Based on the draft prospectus received, we have classified the subordinated notes as having intermediate equity content under our hybrid capital criteria and assigned a 'BB+' rating to the issue. We include securities of this nature, up to a maximum of 25%, in our calculation of total adjusted capital, which forms the basis of our consolidated risk-based capital analysis of insurance companies. Such inclusion is subject to the bonds being considered eligible for regulatory solvency treatment and the aggregate amount of included hybrid capital not exceeding the total amount eligible for regulatory solvency treatment. The confirmation of the equity content and rating are also subject to the notes' final terms and conditions. We expect no changes compared with the draft prospectus.

Cattolica's financial flexibility remains adequate, in our view. Including the upcoming debt issuance, the leverage ratio should remain at about 10% and the fixed-charge coverage ratio at more than 10x. In 2011, shareholders renewed the board of directors' mandate, initially granted in 2006, to increase the share capital through a rights issue of a maximum €500 million.

We consider that Cattolica's exposure to Italian sovereign risk is high. Italian government bonds alone made up two-thirds of the group's invested assets on Sept. 30, 2013. Consequently, we are unlikely to rate Cattolica higher than the long-term foreign currency sovereign credit rating on Italy.

## **Outlook**

The negative outlook on Cattolica primarily reflects that on Italy, given the high concentration of Cattolica's investments in Italian government bonds. In application of our criteria, any downgrade of Italy would trigger a similar downgrade of Cattolica.

The negative outlook also incorporates potential deterioration of Cattolica's capital adequacy as a result of further unfavorable economic and financial trends in Italy.

We could lower the ratings on Cattolica if further potential deterioration in

Italian financial markets was such that we believed it would materially impair our view of the company's capital adequacy or risk position.

We could consider revising the outlook to stable, at any time over the next two years, if the outlook on Italy were revised to stable.

## Rating Score Snapshot
