L'outlook relativo ai suddetti Credit Rating è stabile. I rating riflettono la solidità patrimoniale di CattRe, che AM Best valuta come molto forte, nonché la sua adeguata performance operativa, il limitato profilo di business e un'appropriata gestione del rischio d'impresa. Anche per CattRe i rating tengono in considerazione, come elemento di potenziamento, l'entrata della società nel gruppo Generali.

AM Best Assigns Credit Ratings to Societa Cattolica di Assicurazione S.p.A. and TUA Assicurazioni S.p.A.

AMSTERDAM, 7 December 2021—AM Best assigned the Financial Strength Rating of A (Excellent) and the Long-Term Issuer Credit Rating of “a+” (Excellent) of Societa Cattolica di Assicurazione S.p.A. (Cattolica) (Italy) and affiliate TUA Assicurazioni S.p.A (Tua) (Italy). The outlook assigned to these Credit Ratings (ratings) is stable.

The ratings reflect Cattolica’s balance sheet strength, which AM Best assesses as strong, as well as its adequate operating performance, neutral business profile and appropriate enterprise risk management (ERM).

The ratings also consider, in the form of rating lift, AM Best’s expectation that Assicurazioni Generali S.p.A. (Generali) will fully integrate Cattolica within the Generali group and will provide explicit support if needed.

Cattolica’s balance sheet strength benefits from risk-adjusted capitalization, as measured by Best’s Capital Adequacy Ratio (BCAR), at the strongest level; AM Best expects the company’s risk-adjusted capitalisation to be maintained at least at the very strong level. A limiting factor is the group’s high, albeit reduced, exposure to Italian government debt, representing 43.4% of its invested assets at 3Q/2021 (3Q/2020: 48.2%) and creating considerable exposure to spread risk.

Cattolica has achieved an average return-on-equity of 4.1% for the past five years (2016-2020) and an

average combined ratio of 92.5%, as calculated by AM Best. Non-life underwriting performance was particularly good in 2020 (a combined ratio of 86.8%, as calculated by AM Best) driven mainly by an improvement in motor loss experience due to lower vehicle usage, which is expected to continue into 2021. Cattolica's life business is also profitable, with a 2.27% margin between average segregated accounts yield and average minimum guarantee (at 3Q/2021). The company's life business profitability is also supported by management initiatives to adjust the product mix toward capital-light products. For 2020, the company reported a pre-tax profit of EUR 174 million.

Cattolica has an established position in the Italian market, as the seventh largest insurer (according to Ania) and benefits from an extensive and diversified distribution network. Cattolica is highly dependent on joint ventures with banking partners for the distribution of life products; however, life premium volume has dropped as the company sold its stake in Lombarda Vita in 2020.

The group has an appropriate level of ERM to identify and control most of the key risks it faces. The company addressed the deficiencies highlighted by an unfavorable report issued by the Italian regulator, Istituto per la vigilanza sulle Assicurazioni (IVASS), in early 2021. AM Best expects that the company will further benefit from integration with the Generali group, allowing the company to leverage Generali's well-developed class control system framework.

TUA is a subsidiary of the Cattolica group that writes non-life products in Italy mainly through non-tied agents. TUA's ratings reflect its strategic importance to Cattolica as a source of growth and earnings.

AM Best Assigns Credit Ratings to CattRe S.A.

AMSTERDAM, 7 December 2021—AM Best has assigned a Financial Strength Rating of A- (Excellent) and a Long-Term Issuer Credit Rating of “a-” (Excellent) to CattRe S.A. (CattRe) (Luxembourg). The outlook assigned to these Credit Ratings (ratings) is stable.

The ratings reflect CattRe’s balance sheet strength, which AM Best assesses as very strong, as well as its adequate operating performance, limited business profile and appropriate enterprise risk management.

The ratings also consider, in the form of rating lift, AM Best’s expectation that Assicurazioni Generali S.p.A. (Generali) will provide explicit support to CattRe if needed.

CattRe’s balance sheet strength benefits from its risk-adjusted capitalisation, as measured by Best’s Capital Adequacy Ratio (BCAR), which was at the strongest level in 2020. AM Best expects the company’s risk-adjusted capitalisation to remain at the strongest level through the medium term. Limiting factors to the balance sheet strength assessment include the company’s dependence on retrocession and the potential for volatility in capitalisation metrics, driven by the company’s small capital base.

CattRe’s operating performance has been in line with management’s expectations since Societa Cattolica di Assicurazione S.p.A. (Cattolica) acquired the company in 2018. In 2020, the company reported a pre-tax profit of EUR 5 million and a combined ratio of 88% (as calculated by AM Best). Technical results are expected to remain stable into 2021.
